Good afternoon,

I was recently stunned by the recent decision by the TCEQ to grant a permit to TexCom for placement of waste injection wells in Montgomery County. Lake Conroe, the San Jacinto River and the local water table, which are adjacent to these well sites supply hundreds of thousands of homes and business in the greater region and are now immediatley treated by contamination and improper safeguards. How a local regulatory agency that operates under your guidance can be allowed to move forward with such disregard for the community and public which they serve is egregious and self serving. The potential for catastrophic consequences to the greater community is staggering and has been oppossed by a majority of the residents and local elected officials. I demand that you take up an oversight position into this action immediatley and address the concerns of the local community of District 6. Failure to move quickly could have repurcussions that will impact the area indefinitely.

Please join with me in addressing this matter with the attention and focus that it deserves.

Best regards,

Alexander A. Valero
